

WEDDING RECEPTION TENT & TABLE LAYOUT OPTIONS

TABLE SEATING

Table seating arrangement is an important element to consider when planning your wedding or event.

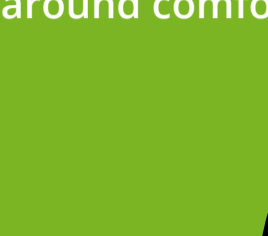

Not only do you need to choose the shape (round, square, or rectangular), you will have to decide how many people you would like to seat at each table.

Here are some table layouts for your inspiration.

ROUND TABLES

Each table can seat up to 8 to 10 guests (Note: The more guests to a table the less space they have to move around comfortably).

Allow individuals to freely move around and get to their seats with ease.

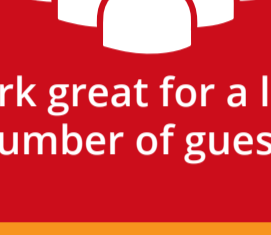

Encourage conversation.

LONG DINNER TABLES

Resemble family style dinner table.

Work great for a large number of guests.

Work great for buffet style events.

MIX OF BOTH ROUND AND LONG TABLES

Wedding Party can be seated along one table so other guests are able to freely communicate with the wedding party in addition to the bride and groom.

Create a unique wedding layout design.
